

AMENDMENTS TO THE CLAIMS

Please cancel claims 8-9, 11 and 13 without prejudice or disclaimer of their underlying subject matter.

1-9. (Canceled)

10. (Currently amended) ~~The display language conversion system according to claim 9~~ A display language conversion system in an image processing system by a computer comprising:

storage means adapted to store data base data, said data base data including image data, first language data and second language data;

an image display processing means adapted to read said data base data from said storage means and to convert said data base data into display data for display on a display means as a screen, said screen including a blowoff frame, said first language data being displayed within said blowoff frame; and

another-language display processing means adapted to determine a position of a mouse pointer on said screen,

wherein, when said mouse pointer is positioned at said blowoff frame, said another-language display processing means reads said second language data from said storage means and displays said second language data on said display means,

wherein said another-language display processing means displays said second language data at an optional display region of said screen, and

wherein, when said mouse pointer is not positioned at said blowoff frame, said another-language display processing means prevents display of said second language data and displays said first language data at said blowoff frame.

11. (Canceled)

12. (Currently amended) ~~The display language conversion system according to claim 11~~ A display language conversion system in an image processing system by a computer comprising:

storage means adapted to store data base data, said data base data including image data, first language data and second language data;

an image display processing means adapted to read said data base data from said storage means and to convert said data base data into display data for display on a display means as a screen, said screen including a blowoff frame, said first language data being displayed within said blowoff frame; and

another-language display processing means adapted to determine a position of a mouse pointer on said screen,

wherein, when said mouse pointer is positioned at said blowoff frame, said another-language display processing means reads said second language data from said storage means and displays said second language data on said display means,

wherein said another-language display processing means overlays said first language data with said second language data to display said second language data,

wherein said another-language display processing means displays said second language data until said mouse pointer is positioned at another blowoff frame.

13. (Canceled)

14. (Currently amended) A storage medium that stores a program for functioning a computer as the display language conversion system according to any one of claims 10 and 12.
~~8 to 13.~~

15. (Currently amended) An information selling system comprising a server device and a terminal device connected to the server device through a communication system, the server device being the display language conversion system according to any one of claims 10 and 12. ~~8 to 13.~~

Please add the following new claim.

16. (New) The display language conversion system according to claim 10, wherein said another-language display processing means stops display of said second language data when said mouse pointer is not positioned at said blowoff frame.
